

Acupuncturist Contractors Role – Christchurch Central

I am an established acupuncturist looking to grow capacity. This would be a contractors role, with a split rate per client using equipment and systems set up within the practice. Currently there are 20-30 clinical hours available over 5 days Tuesday – Saturday in a shared room per week.

The Acupuncture room is a separate business located within in a large multi disciplinary sports clinic with over 20 other practitioners which include Physios, Chiropractors, Massage and Sports Doctors. This role would suit someone self motivated with a sports background and/or experience in sports acupuncture with good anatomy and biomechanical knowledge for mainly ACC rehabilitation and muscular skeletal based acupuncture and pain management work.

I will provide training to support systems, with mentoring and support as needed to help your practice. To get established you will need to be good with technology and able to manage your own notes, bookings and payments on the day. Everything else is taken care of. Ideally have experience using Cliniko (or similar), have confident communication skills to network and build your practice and connect with clients who are mostly new to acupuncture.
